SCOTTY'S CONTRACTING AND STONE LLC WINS NATIONAL AWARD FOR QUALITY IN ASPHALT PAVING

Lanham, Md. — The National Asphalt Pavement Association (NAPA) announced today that Scotty's Contracting and Stone LLC of Bowling Green, Ky., has won a 2012 Quality in Construction Award for excellence in construction of an asphalt pavement. The company received its award on Wednesday, Feb. 13, at a ceremony during the association's 58th Annual Meeting in Scottsdale, Ariz.

The Quality in Construction Award recognizes asphalt pavements of excellence. "The Quality in Construction Award recognizes paving jobs completed in line with best practices and standards known to yield high-quality asphalt pavements," stated Kurt Bechthold, 2012 Chairman of the NAPA Board of Directors. "This award demonstrates the high quality of work Scotty's Contracting and Stone LLC is achieving."

Scotty's Contracting and Stone LLC won the award for the construction of a 2.6-mile extension of the William H. Natcher Parkway and the reconfiguration of the I-65 interchange at Exit 20 in Bowling Green, Ky. The project was initially let as two separate jobs under an alternate bid process that allowed asphalt or concrete to be considered for the work. Scotty's Contracting and Stone won both bids and was able to combine the projects into a single asphalt job. The company met the project's tight specifications for grading, asphalt production, and paving, resulting in a high-quality, extremely smooth-riding road.

###

The National Asphalt Pavement Association (NAPA) is the only trade association that exclusively represents the interests of the asphalt producer/contractor on the national level with Congress, government agencies, and other national trade and business organizations. NAPA supports an active research program designed to improve the quality of asphalt pavements and paving techniques used in the construction of roads, streets, highways, parking lots, airports, and environmental and recreational facilities. The association provides technical, educational, and marketing materials and information to its members; supplies product information to users and specifiers of paving materials; and conducts training courses. The association, which counts more than 1,100 companies as members, was founded in 1955.
