SCOTTY'S CONTRACTING AND STONE LLC WINS NATIONAL AWARD FOR QUALITY IN ASPHALT PAVING

Lanham, Md. — The National Asphalt Pavement Association (NAPA) announced today that Scotty's Contracting and Stone LLC of Bowling Green, Ky., has won a 2015 Quality in Construction Award for excellence in construction of an asphalt pavement. The company received its award on Wednesday, February 10, at a ceremony during the association's 61st Annual Meeting in La Quinta, Calif.

"The asphalt pavement industry is committed to building quality pavements that deliver high performance and drivability to the public," said Michael Cote, NAPA 2015 Chairman. "All contractor's projects earning a Quality in Construction Award are measured against industry best practices designed to live up to our promise. I'm honored to say that, in earning a 2015 QIC Award, Scotty's Contracting and Stone has met or exceeded these rigorous standards."

Scotty's Contracting and Stone won the award for its work on Glasgow Outer Loop in Barren County. This was an alternate bid contract and Scotty's Contracting and Stone won the job with its very competitive all-asphalt bid. Working with multiple paving crews and two plants producing the required asphalt mixtures, the company planned the phasing, scheduling, and traffic control carefully to make the project a success. Scotty's Contracting and Stone produced, within a tight schedule and budget, an asphalt pavement with excellent ride quality.

###

The National Asphalt Pavement Association (NAPA) is the only trade association that exclusively represents the interests of the asphalt producer/contractor on the national level with Congress, government agencies, and other national trade and business organizations. NAPA supports an active research program designed to improve the quality of asphalt pavements and paving techniques used in the construction of roads, streets, highways, parking lots, airports, and environmental and recreational facilities. The association provides technical, educational, and marketing materials and information to its members; supplies product information to users and specifiers of paving materials; and conducts training courses. The association, which counts more than 1,100 companies as members, was founded in 1955.
